Education

Dwarkadas J. Sanghvi College of Engineering, Mumbai 2025 – 2029
Bachelor of Technology (B.Tech) in Information Technology

Pace Junior Science College, Mumbai 2023 – 2025
Higher Secondary Education (12th Grade)

Technical Skills

Languages: C++, Python, Java, C

Web: HTML, CSS(basic), JavaScript

Core CS: Data Structures and Algorithms, Object Oriented Programming

Tools: Git, GitHub, Kali Linux, VS Code

Projects

1. Jarvis – Virtual Assistant — GitHub 2024
Python-based voice assistant with speech recognition and text-to-speech modulation.

- Developed voice command processing using `speech_recognition` and `pyttsx3`.
- Integrated automation tasks including system operations
- Enhancing contextual response handling and expanding assistant capabilities.

2. RAG-Model Chatbot — GitHub — Demo Link 2026
A personally trained AI assistant with persistent memory and real-time learning, deployed as a full-stack web application.

- Built a personal AI assistant from scratch using the Groq API and a custom RAG knowledge base trained on my own datasets, giving it a unique personality and response style.
- Implemented a persistent memory system backed by MongoDB that remembers the user's name, preferences, instructions and goals permanently across all sessions.
- Integrated real-time web search so the AI automatically learns new information it doesn't know, saves it to a cloud database, and uses it in future conversations.
- You can access the project at nexus-ai-vs58.onrender.com

3. Portfolio Webpage — GitHub — Demo Link 2026
Created my own Portfolio webpage using HTML, CSS and JavaScript.

- Designed an immersive cyberpunk UI with glassmorphism, animated aurora backgrounds, particle effects, and 3D card tilt delivering a memorable user experience.
- Integrated Web3Forms API for real-time email delivery via the contact form, with loading states, success confirmation, and error fallback.

- Developed a responsive portfolio with animated skill bars, a projects gallery with live/GitHub links, and a one-click resume download feature.

4. Recipe Book CLI Application— GitHub

2024

Built a Python-based CLI Recipe Book application that enables users to search and retrieve pre-defined recipes by name or ingredients using structured data handling.

- Developed a Python-based CLI Recipe Book that allows users to search pre-defined recipes by name or by ingredients.
- Used nested dictionaries and lists to organize recipe data efficiently.
- Implemented modular functions and menu-driven search logic for smooth user interaction.

Interests

- I am highly passionate about coding and continuously learning new technologies, frameworks, and problem-solving techniques to strengthen my development skills and stay updated with industry trends. Alongside this, I actively engage in sports like Chess, Badminton, and Table Tennis, which enhance my focus, strategic thinking, and discipline, and I enjoy reading books to broaden my perspective and support my continuous learning mindset.

Achievements

- Solved 220+ Data Structures and Algorithms problems across all platforms
- Completed an 8 hour Cybersecurity Bootcamp, learning a lot of new things
- Participated in Hackfusion, a hackathon organized by SPIT, Mumbai
- Have achieved a rating of 603 on Codeforces platform
